

# NCR General POS Solution–Retail

## Point-of-Sale Software

Want to focus on your customers, knowing both your current and future POS needs are covered?

YES

### NCR General POS Solution is your complete retail solution

NCR General POS Solution is a complete, scalable system that meets your store's point-of-sale needs. It adapts to different operation sizes, layouts and formats. NCR General POS Solution can grow as your business grows to accommodate your changing needs.

- **Single-source technology solution**

NCR General POS Solution includes hardware, software and services. It operates in several languages and supports a wide range of configurations.

- **Every retail feature need is met**

Item-level sales restriction and age audit are just two of the many capabilities that are standard with NCR General POS Solution.

- **Store- and chain-wide management**

Enhanced data consolidation and reporting are provided via the optional Managers Workstation in the store and the Corporate Workstation at chain headquarters. These tools provide store- and chain-wide data consolidation, management and reporting.

- **Flexible payment options**

Support for credit, debit, gift card, frequent shopper, in-house charge and hotel charge posting provides the payment options your business needs to thrive.

For more information, visit [www.ncr.com](http://www.ncr.com),  
or email [retail@ncr.com](mailto:retail@ncr.com).

- **Capable of both retail and restaurant support**

In addition to supporting general retail environments, NCR General POS Solution provides superior table service and quick service restaurant support. This single system can support multiple POS interfaces. All transaction types are consolidated into one financial view of your operation.

**SOFTWARE COMPONENTS**

- Flexible POS touchscreen or CRT/keyboard application
- Payments subsystem and external interface
- Optional inventory application
- Managers Workstation (MWS)
- Corporate Workstation (CWS)

**CONFIGURATION OPTIONS:**

- Small: Single POS workstation and application
- Large: Multiple POS workstations in the store with MWS at the store level, and CWS consolidating information at a centralized location

**Key Features**

- Complete global solution
- Full-featured application
- Wide range of payment options
- Store and restaurant capabilities
- Superior reporting and data management
- Software maintenance and customized Help Desk services available
